

## **What's the use of an e-portfolio? Retention/professional networking/student led curriculum development**

**Louise Frith, Rachel Thapa Chhetri  
University of Kent**

This workshop will focus on three uses of an e-portfolio. This will be done by telling the story of one students' experience (this part will be delivered by the student). The second half of the workshop will be a discussion with participants about how they have used e-portfolios and ways they think students' e-portfolios can be given greater value by engagement with employers.

**Student presentation of e-portfolio and '*Year in the life of an e-portfolio*'**  
student will talk about her e-portfolio and what has happened as a result of doing it

### **Questions for discussion:**

- What other experience is there about the uses of e-portfolios?
- Has anyone else had experience of using e-portfolio to address retention?
- Has anyone had experience of student led e-portfolio use?
- Are there other examples of students' e-portfolios being encouraged by employers/employment networks?
